

Kyle Rosenberg

Roslyn Heights, NY | (516)-238-5536 | kyle.rosenberg49@gmail.com | [LinkedIn](#) | [Portfolio Website](#)

EDUCATION

Vanderbilt University, Nashville, TN

Graduated May 2026

Bachelor of Engineering, Electrical and Computer Engineering | Minors in Computer Science and Engineering Management

Cumulative GPA: 3.57/4.00

Relevant Coursework: Programming & Problem Solving | Program Design & Data Structures | Differential Equations with Linear Algebra | HTML, CSS, and JavaScript (Coursera) | Intermediate Software Design | Discrete Structures | Algorithms | Special Topics in AI | Game Development | Computer Graphics | Database Management Systems | Artificial Intelligence

WORK EXPERIENCE

Morgan Stanley

New York, NY

Technology Analyst – Application Development

August 2026 – Present

Adobe

San Jose, CA

Software Engineer Intern – Real-Time Customer Data Platform

May 2025 – August 2025

- Built an AI-powered developer assistant using LangGraph to support internal engineering productivity at Adobe
- Developed a pipeline to convert GitHub repositories into vector embeddings and created tools for AI agents to perform semantic search across those embeddings
- Deployed the developer assistant internally, where it has been adopted by multiple teams to support engineering workflows

Vanderbilt University Computer Science Department

Nashville, TN

Undergraduate Teaching Assistant – Programming and Problem Solving

August 2024 – April 2026

- Held office hours to assist students with understanding course material
- Graded assignments and tests, providing feedback to help students improve their programming abilities

InsightCyber

Mineola, NY

Software Engineer Intern

May 2024 – August 2024

- Fine-tuned and developed an LLM tailored for cybersecurity applications, aimed at improving client communication and security
- Developed a custom transformer model using Python and PyTorch, leveraging ScyllaDB for efficient data storage and management during model training

PROJECTS

Formula SAE Data Acquisition System

October 2025 – April 2026

- Developed a data acquisition system for a student-built race car, collecting vehicle and sensor data through CAN bus and Raspberry Pi hardware
- Built a Python desktop application for analyzing test-run data with interactive multi-channel plots, synchronized cursors, and live value readouts
- Processed, decoded, and aligned sensor data by time and distance traveled to support track-level performance analysis
- Contributed to the team's improved overall standing and efficiency-category performance at its end-of-year competition

Tile Typer

January 2025 – March 2025

- Designed and developed a fast-paced typing game in Unity using C# and the Unity engine
- Implemented real-time input handling, UI systems, and scalable game logic architecture
- Collaborated with a team to manage version control, debugging, and performance optimization

AI Matchup Analyzer for the Premier League

September 2024 – November 2024

- Collaborated in a group to develop a soccer analytics tool for performance analysis using web scraping and machine learning
- Applied KMeans clustering and Random Forest to identify patterns and predict match outcomes
- Integrated NLP for keyword extraction and sentiment analysis from match reports

CAMPUS INVOLVEMENT

Theta Tau Engineering Fraternity

September 2023 – May 2026

Google Developer Student Clubs

September 2023 – May 2026

Zeta Beta Tau Fraternity

January 2023 – May 2026

Community Service Committee

Vanderbilt Club Baseball

September 2022 – May 2026

Communications Coordinator

SKILLS AND INTERESTS

- **Programming Languages:** Java | C++ | C# | Python | JavaScript | SQL
- **Technical Proficiencies:** LLM Development | LangGraph | Git | MongoDB | Spring Boot | Linux | Game Development
- **Interests:** Baseball | Robotics | SCUBA Diving | Stock Market | Fantasy Football | Dessert
